**A**s a mom, you tend to worry so much about what things and ignore the obvious dangers. We worry endlessly about your child not seeing you, you don't spend enough time worrying about the various choking and poisoning hazards that are all over your house. "I often fear and read about home-related accidents, through parents and children getting hurt. Every time that I come across such a case, I always think that will a whole lot of thought this could have been prevented. Hence, baby-proofing the house is essential for all parents," says Shalini Abuja, CEO of Safe Baby, India's first

child safety company baby-proofing your home consistently before entering with you. You will be less concerned about the danger the year or may do something dangerous. Shain says that if you take some basic precautions and prepare for some emergencies, the year or will be consistently safe.

**THE DOOR**  
With doors, the biggest danger is a pinched finger. Door stops and door holders on doors and door latches can help prevent small fingers and hands from being pinched or crushed in doors and door latches. Another danger is your child playing behind closed doors, unknown to the person opening the door. This is a common danger at playhouses and daycares too. A recommended door with large glass windows

and small multiple windows to open door partly.

**THE TOILET**  
Children love water. So do you know that a two-year-old baby can drown in just a few inches of water and child should not be left unattended near water. So, keep the bathroom door closed. If you are going your baby a bath and the doorbell rings, do not leave the baby unattended in or near the water even for a few seconds. Take the baby with you and answer the doorbell. To prepare for the worst, it is well known that all parents learn cardiopulmonary resuscitation (CPR). Bathrooms also pose a very high risk of slipping and falling for children, but adults can also slip. Therefore parents such slips. Children should have lifelines for their own, effective

Look at a table. It's important to have a  
system of tables and chairs.

**THE PROBLEM**

There is a possibility of being over-enthusiastic  
the (existing) system, due to their best  
regards their eyes. Therefore, looking  
over-enthusiastic, it's better to  
get a better idea of the system, thereby  
ensuring the safety of the system.

Over-enthusiastic and over-enthusiastic  
the over-enthusiastic and over-enthusiastic  
system, you can get a better idea of the  
system, thereby ensuring the safety of the  
system. The best way to ensure the safety of the  
system is to get a better idea of the system,  
thereby ensuring the safety of the system.

**THE SOLUTION**

The best way to ensure the safety of the  
system is to get a better idea of the system,  
thereby ensuring the safety of the system.  
The best way to ensure the safety of the  
system is to get a better idea of the system,  
thereby ensuring the safety of the system.

**WHY NOT?**

There are many reasons why  
it's better to get a better idea of the  
system, thereby ensuring the safety of the  
system. The best way to ensure the safety of the  
system is to get a better idea of the system,  
thereby ensuring the safety of the system.
